21. InstructorComments Type: Short answer

Summary comments on instructor:

Number of users answered: 15

- Brocker is a great professor. He knows how to keep students engaged and present course material in a way that I easy to digest and retain.
- helped students tremendously
- Professor made this class extremely relatable and was accessible for questions on class topics and general career or FSC/internship questions. I enjoyed being in his class!
- I love this professor
- Very accessible and communicated the material very well.
- Thank you so much for an engaging and meaningful class this semester. I truly appreciate your support, patience, and willingness to answer questions whenever I needed clarification. Your understanding and encouragement made a real difference, especially during the more challenging parts of the course. I am grateful for the knowledge and skills I gained through your teaching. Thank you again for your dedication and for creating such a positive learning environment.
- Professor Brocker communicated everything he needed to for this class wonderfully. He is an extremely passionate teacher with a greatly appreciated sense of humor and relatability.
- Professor Brocker was great! You can tell that he really cares about teaching. He is very funny and I really enjoyed coming to class to get a good laugh (and to learn of course). I am very glad I had him as a professor!
- Instructor is very fair and understanding. He gave us an opportunity to grow as students while leading us in the right direction.
- Professor Brocker made what seemed liked a difficult class and made it very interesting and understandable. He made time for after class discussions and eased tension about each subject making it a bearable course.
- Best professor I have ever had, made leading so fun and i actually wanted to come to class for once
- An amazing class thank you!
- Brocker made sure to keep the course entertaining. Whenever someone needed help he would always help to the best of his abilities. Most people did not seem to find him funny but this was the most entertaining class I have ever taken because of him. I looked forward to coming to class everyday. I would recommend Brocker to anyone and everyone and I would love to take another course with him. The tests were horrible.
- Professor Brocker is a great professor and was very understanding with coursework confusion and would offer help anytime I needed it. He made class fun and interesting every day and made a class that was hard enjoyable.
- Professor Brocker makes Research Methods seem less scary. He is easy to talk to and available outside of class. He is friendly and cares about his students.

22. LearningProcess Type: Short answer

Comments on the learning process:

Number of users answered: 12

- The sequence in which topics/ materials were presented was good. Material was easy to understand as well.
- The lectures were very clear and easy to follow and tests were extremely fair. We were a bit short on time towards the end of the semester for our papers but this professor made himself available.
- Learning was made easy because of the pace we were lectured at.
- It was a great class, everything was very organized
- Research is a field I have decided to pursue after taking this class so I would say things went very smoothly.
- I liked everything we learned about in class and I think all the material was very organized. The exams could be slightly complicated, but all the other assignments for the research paper were pretty easy to follow.
- For someone who does not love research I enjoyed the learning process through the instructor.
- I wish there was more time to build on the research (no fault of his own) but something this extensive I wish I had more time to better fix certain aspects of my research.
- Great
- Material was set up to be very easy to understand. Tests were horrible.
- The learning process was fair and enjoyable. His lectures were always tailored to his class to make it interesting and easy to concentrate on.
- This class was very challenging for me because I do not like research. The tests were hard but I am grateful for the paper that will boost my grade.

Please make any suggestions about how this course could be improved.

**Number of users answered:** 11

- The sequence in which topics and assignments were presented were good, but I feel the class would be better if it was paced a little differently. Towards the end of the semester I feel as if I'm scrambling just a little to turn in my assignments.
- If I had to make a suggestion I would just say a better balance of lecture material focus and research paper focus. There were times were one felt a bit more neglected than the other.
- None
- No notes!
- The only suggestion I would say is to maybe tweak the study guides a little so that match more closely with the type of questions that will be on the exams. Overall, I really enjoyed this class!
- Assign in class assignments or easy homeworks to help students stay engaged with the material.
- More notice before exams
- Make a PowerPoint version that can be downloaded without all of the movement edits.
- Fix the tests please.
- I have no suggestions.
- I think the test questions were worded in a way to trick us most of the time and not straight forward. That made it very challenging for me. I also think some of the kahoot questions should be on the exams.
